

MONETRA[®]

Payment Switch Software

Acquirers
and
Processors

- Reliable, non-stop transaction processing and sophisticated, automatic communications fail-over
- Supports thousands of merchants and millions of transactions
- Connects into any IT environment via open API and enterprise-class SQL support
- Protects sensitive data with comprehensive PA-DSS and PCI compliance
- Wide range of supported processors and industries

The Monetra[®] payment switch software uses a high-performance, multi-threaded architecture which can concurrently process thousands of transactions per minute, for thousands of different merchants, and simultaneously route to any number of transaction processors. Comprehensive SQL database support and an open API lets you interconnect transaction processing data with your billing and reporting systems.

MONETRA[®] Payment Switch Software

Monetra[®] provides a rich set of features and capabilities to support every application:

- Built-in data encryption and multi-user password support
- Supports secure SSL communications for incoming and outgoing connections
- Connects via dial-up modem, high-speed Internet and Frame Relay/Leased Lines
- Concurrently supports unlimited merchant accounts through multiple processing institutions
- Protects sensitive data with comprehensive PA-DSS and PCI compliance. API's available in C/C++, C#, VB.Net, Java, Perl, PHP and Delphi

Hardware Requirements:

Monetra supports 32-bit and 64-bit Intel, 64-bit Sparc, and 64-bit PPC CPU architectures, with minimal requirements for memory and disk space. Additional memory and a separate database server are recommended for extremely high-performance applications.
